# Help

Thank you purchased the "smith's home" project.

You can open the demo secene from "smith home v4" folder. Please confirm you are run the newest Unity version after 5.32.

There added some new models in Smith's home since version 4.5 let you can open/close the door for furnishing and device, you can find new models that located in "models can open door" folder. Other models are located in "smith models" folder.

In version 4.8 we recreated some props like chair and dining table, the previous old models has put in 'old models' folder. Also added some new props, fixed some axis problem, changed some texture.

For any question, please freely contact me, Email: service@wensk.com.
